

HYGIENIC FLOORING SYSTEMS

THE HYGIENIC FLOORING SPECIALISTS

Kemtile Limited have been supplying hygienic floor and wall finishes to the food, drink and pharmaceutical industries since 1979. They are known throughout the food and drink industry for their quality of workmanship, attention to detail and customer service.

Kemtile are highly experienced in the food and drink industry

Kemtile understand this industry, respect its constraints and appreciate its specific needs. Kemtile have worked for almost every major brand in the food and drink industry.

To ensure that their customers are completely satisfied and that their projects have the maximum possible

design life Kemtile select the most suitable, proven materials from the most reliable suppliers. They work closely with all their suppliers on trials to evaluate new materials and maintain quality on existing products.

Kemtile and their suppliers are specialists; they have developed specific knowledge about the precise requirements of the food and drink industry including food manufacture, large scale catering, baking, brewing and drinks processing. They understand the way it works and know instinctively exactly what is needed to complete each individual project to the customer's satisfaction. Kemtile have excellent site management skills, retain a dedicated Health and Safety Consultant and employ a highly skilled workforce.

Hygienic Flooring Solutions

Kemtile are known for working to budget and delivering on time

LARGE NEW BUILD PROJECTS

On large newbuild projects Kemtile will typically work for the main contractor to supply flooring and drainage systems and wall finishes. These large contracts can be price sensitive but they are also time driven. With a new building you only get one chance to do it properly and contractors are typically working to very tight schedules. Kemtile are known for working to budget and delivering on time.

NEW BUILD PROJECTS

On medium sized new build projects Kemtile can act as principal contractor managing health and safety issues and can supply a full design service as an extra if required. If Kemtile are not requested to undertake the basic design they can work to your design and still provide a full project management service installing floor systems, drainage, kerbs and wall finishes.

REFURBISHMENT

Refurbishment is a niche market for Kemtile they are experienced in working to very tight time constraints in brief shutdown periods often during national holidays when no-one else is working. Kemtile also have expertise in doing refurbishment work within a temporary dust free structure whilst manufacture continues on adjacent production lines.

CERAMIC OR SEAMLESS?

Both systems have their advantages and, if quality products are used and installed correctly, both have an excellent design life. Kemtile offer both ceramic and seamless flooring with Ucrete and Kagetec and so they are one of only a handful of companies who can advise you on the best system, without bias.

As a general rule where existing floors have the correct falls to drains then

Kemtile would recommend using Ucrete seamless flooring as it is cheaper. If the existing floor is flat then they would recommend Kagetec ceramic flooring as falls can be incorporated into the work making this the less expensive option.

If it is anticipated that plant may be moved within the life of the floor then ceramic may prove the best option. With Kemtile you don't have to make the decision until you have all the information presented to you in a way that makes it easy to compare the options.

ONE STOP SHOP

Kemtile can also install stainless steel kerbs, prepare your sub-floor, design and install the drainage and supply the wall finishes. In fact Kemtile are a one stop shop for building or refurbishing your manufacturing facility.

HYGIENE AND HEALTH AND SAFETY

Kemtile are committed to quality and customer service and part of that commitment is ensuring that all Kemtile operatives are trained and regularly updated on issues of hygiene and health and safety. Kemtile operatives carry CSCS cards and Food Industry Safety Passports. Kemtile are registered under the Safecontractor, CHAS, CSCS and Constructionline accreditation schemes.

SAFECONTRACTOR; CHAS; CONSTRUCTIONLINE

These are independent contractor accreditation schemes that assess the health and safety competency of contractors. Clients have a legal obligation to ensure that their contractors operate in a safe way. There is therefore a need to assess contractors' health and safety arrangements, and increasingly this is being carried out through these schemes.

FOOD INDUSTRY SAFETY AND HYGIENE PASSPORT SCHEME

Leading food manufacturers together with the Process and Packaging Machinery Association (which represents many of the leading contractors in the food industry) runs this food industry led scheme. Safety Pass Alliance via a credit card type passport provides accreditation.

CSCS

The Construction Skills Certification Scheme is a readily identifiable standard for the Construction Industry - it is a mark of quality and competence for all contractors. Holders of the card must prove their competence in their own sector of the industry and pass a health and safety test. All Kemtile operatives carry a CSCS card.

CDM 2007 (Construction, Design and Management)

Kemtile possess the experience and competence in managing turnkey projects as Principal Contractor and CDM-Coordinator. We encourage and provide a team approach to the management of health, safety and the client environment.

SLIP RESISTANCE

As full members of FERFA and the TTA this is a key issue with industrial flooring in today's risk averse environment. Slip resistance is a very complicated subject and the products supplied depend on the environment they will be working in, the type of traffic using the floor and the cleanliness of the floor. There is a connection between slip resistance and cleanability and between cleaning regimes and slip-resistance. Kemtile are experts in this field and will not only specify the optimum surface for your production facility but they will also advise on a cleaning regime to keep that surface slip resistant and hygienic.

KEMTILE PRODUCTS

KAGETEC Probably the best tiling systems in the world

Kagetec tiling systems are engineered in Germany by Van Koetsveld & Grimberg GmbH. Kemtile are the exclusive UK and Eire applicator for Kagetec Tiling Systems.

UCRETE POLYURETHANE SEAMLESS FLOORING

Kemtile have been the approved Ucrete applicator longer than any other company. Ucrete is the original, and best, high performance Polyurethane Concrete, developed more than 30 years ago in England as the answer to the most demanding environments in industry.

TECHNICAL DATA

For more information on the products that Kemtile install ask for a copy of the technical leaflet or go online to www.kemtile.co.uk

DRAINAGE DESIGN AND PROTECTION

Kemtile provides a comprehensive range of stainless steel drainage and protection barriers. Kemtile are sole UK agents for Wiedemann Drainage Systems of Germany. The range is of the highest quality and very realistically priced.

STAINLESS STEEL KERBS

The stainless steel kerbs that Kemtile supply and install are designed and produced by SAW McBride & Sons of Shrewsbury specifically for the Food & Drink Industry. They can be up to 18 metres long and are a standard cross section. Corners to walls and pillars are preformed in the factory.

Hygienic Flooring Solutions

CUSTOMER COMMENTS

“I have used Kemtile on many occasions at a number of food manufacturing facilities for the past 15 years, there flooring systems have always been of the highest quality and have stood the test of time. They not only offer an excellent product but also a very professional and versatile service.”

Pork Farms Limited, Palethorpes

“Kemtile understand my industry they have almost 30 years experience of refurbishing and fitting out food factories. They used that knowledge to assist with the design of both the floors and the drainage system to ensure that it met our precise needs. The floor is living up to its promise, in fact we don't think about it; its there and it does its job.”

Bakkavor Ltd, Crewe

“We have used Kemtile on numerous projects over the years and they continue to provide a confident reliable service in at times difficult conditions - they provide flexible solutions to minimise the impact on production whilst creating a professional resilient floor surface. I would not hesitate in recommending them to others.”

Princes Ltd, Cardiff

“I have worked with Kemtile for 10 years as a client. They have delivered more than 52 weekends in every year and although they may be expensive they always deliver quality on time and often at short notice. I fall in and out of love with contractors all the time and at the moment I love them. Although I would like to recommend them to others, I shan't as I want them to be available to me constantly.”

Lorien Engineering Solutions Ltd

“Kemtile provided Manor Bakeries with a solution to how do to refurbishment a floor within a working bakery.”

Manager, Manor Bakeries (RHM UK)

Unit C3, Taylor Business Park, Risley, Warrington, Cheshire WA3 6BL. UK.
