

ESSENTIAL MAINTENANCE DURING THE CHRISTMAS SHUTDOWN – IT ISN'T TOO LATE

Kemtile regularly do essential upgrading and maintenance work during brief holiday shut downs and Christmas is their busiest time. Refurbishment is a niche market for Kemtile; they are experienced in working to very tight time constraints in brief shutdown periods often during national holidays when no-one else is working. Kemtile still have some vacant slots over this coming Christmas period.

Kemtile also have expertise in doing refurbishment work within a temporary dust free structure whilst manufacture continues on adjacent production lines; so if, like the windmill, you never close Kemtile can help.

Kemtile have been supplying hygienic floor and wall finishes to the food, drink and pharmaceutical industries since 1979. They are known throughout the food and drink industry for their quality of workmanship, attention to detail and customer service. Kemtile understand this very exacting industry, respect its constraints and appreciate its specific needs. Kemtile have worked for almost every major brand in the food and drink industry and they are known for working to budget and delivering on time.
